DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoneda et al (US 5175680).

Claim 1: a numerical controller comprising means for receiving a slave axis motion suspending command (Fig. 3: 201, a moment of time must pass first before the error is calculated) and means for suspending the motion of the slave axis and subtracting an amount of the motion command for the master axis from a coordinate value of the slave axis (Fig. 3:202, calculating the difference between the master and slave axes) when the suspending command (Fig. 3: 201) is received.

Claim 2: means for receiving a slave axis motion resuming command and means for resuming the motion of the slave axis when the resuming command is received. (Fig. 3: 207; Col. 5: 48-55, a new command is generated and the slave is rotated at a new speed).
